**Email:** [andrei.hondrari@gmail.com](mailto:andrei.hondrari@gmail.com)

Software engineer with experience in hardware, team leading, supervising, client relations and teaching.

## EXPERIENCE

### Software Consultant

December 2016 - Present

Full-Stack Engineer

### Technical Lead at Spyhce

July 2016 - December 2016 (6 months)

### Software Engineer at Spyhce

February 2016 - July 2016 (6 months)

### Internship Tutor at Spyhce

May 2016 - June 2016 (2 months)

I have coached interns by helping them understand the workflow of a project, the way to properly use tools for version control and project management, as well as how to use proper techniques and to make proper decisions in software development.

### Hardware Software Engineer at Spyhce

October 2015 - February 2016 (5 months)

I've used .NET client made libraries to interact with the client's custom hardware, to develop a plugin based test environment. I've also interacted with a robotic arm via serial communication and used Raspberry Pi to gather various sensor inputs from the test environment. I've also helped ensemble and test some electronic sensors. Other technologies used in this project were NFC and custom communication protocols.

### Full-Stack Software Engineer at Spyhce

January 2014 - September 2015 (1 year 9 months)

### Software Developer at Fortech

November 2012 - January 2014 (1 year 3 months)

I have worked with several technologies such as Qt, RESTful services, HTML/CSS/JavaScript plugins via WebKit, SQLite via a specialized database API, bluetooth communications and I've also performed application skinning,

## EDUCATION
